

Liminal Announces \$5M Seed Led by Fin Capital

Client News

June 5, 2024

Gunderson Dettmer represented client Liminal, a leader in horizontal generative AI data security, in its \$5 million Seed financing led by Fin Capital. Using Liminal's model agnostic, horizontal platform and secure workflow tools, organizations can unlock the productivity benefits of generative AI while confidently maintaining regulatory compliance and protecting sensitive data such as intellectual property, employee, customer, and other private information. The company will use the new capital to expand its ability to quickly enable customers to securely deploy and use generative AI.

In the [announcement of the transaction](#), Liminal CEO and founder Steven Walchek said, "The rise of generative AI and its associated security risks have made it challenging for regulated enterprises to adopt these technologies. Our platform and workflow tools are designed to help organizations quickly get started with the low-lift, high-impact use cases, while also providing the necessary safeguards for more complex and transformational AI implementations."

The Gunderson Dettmer deal team was led by Michael Irvine and included Jesse Birbach, Nate Gray, Marissa Boykin and Radhika Raman.
