

Czech-based E2B Announces \$11.5M Seed Financing

Client News

October 18, 2024

Gunderson Dettmer represented Czech-based client E2B, a cloud infrastructure designed specifically for AI agents and applications, in its \$11.5 million Seed financing led by Decibel Partners. E2B's platform simplifies the process of running and testing AI-generated code in “sandboxes”—secure testing environments that use a company's own data.

In the [announcement of the transaction](#), E2B cofounder Václav Mlejnský said, “At E2B, we're building an open-source cloud environment for the era of software built by artificial intelligence and AI agents. An AI agent is software that autonomously interacts with its environment, gathers data, and uses this information to achieve predefined goals. To make these agents as autonomous and reliable as possible, they need a specialized cloud environment where they can safely operate and use other tools to meet their objectives.”

The Gunderson Dettmer deal team was led by Nic Markman and Tom Villeneuve and included Chase Beckstead, Umar Chaudhary and Will Bassett.
