

Verisoul Raises \$8.8M Series A Led by High Alpha

Client News

December 16, 2025

Gunderson Dettmer represented client Verisoul, the all-in-one platform for stopping fake accounts and fraud, in its \$8.8 million Series A financing led by High Alpha, with participation from Lookout Ventures, Bitkraft, Bain Future Back Ventures, and Third Prime.

Verisoul acts across the entire user lifecycle — from first click to conversion and beyond. By combining real-time behavioral, device, and network forensics with identity signals such as email intelligence and ID verification, the platform builds a holistic, high-fidelity profile of every user.

The company will use the capital to significantly expand its team, accelerate product development, and scale its go-to-market efforts as it helps businesses defend against increasingly intelligent fraud.

In the [announcement of the transaction](#), Verisoul co-founder and CEO Henry LeGard said, “Fake users are overwhelming the internet, and AI is making the problem exponentially worse for virtually every digital business. We started Verisoul to stop fraud at every moment throughout the user journey — empowering companies of all sizes and in all industries to ensure users are real, unique, and trusted.”

The Gunderson deal team was led by Wes Watts and included Alex Devine and Nicole Boyd.
